This volume contains in one collection, for the sake of convenient reference, the social and linguistic maps appearing in the various report volumes of the Census of India series, 1931. It is regretted that in some copies of this volume the series of maps is not entirely complete, as enough spare copies were not available for binding from all provinces and States. No linguistic map of the United Provinces was prepared. In most of the linguistic maps the simultaneous use of two languages is shown by the over-lapping of the hatchings. The figures of this bilingualism are given in Table XV (Part II of Vol. I).
